Financial Intermediation Research Society (FIRS)

The Financial Intermediation Research Society is a global society of research scholars dedicated to the purpose of stimulating, promoting and disseminating research in financial intermediation. Specifically, the society will: (1) maintain a website that will provide information on conferences on financial intermediation topics worldwide, outlines of doctoral courses taught at various schools, and research papers; (2) organize conferences on financial intermediation and related topics; and (3) appoint the board of editors of *The Journal of Financial Intermediation*.

The main goal of the society is to provide a forum for those interested in financial intermediation and corporate finance research worldwide to be able to have ready access to each others research and to be able to communicate and coordinate more efficiently on a variety of issues, including the organization of conferences. Our hope is also to bridge the gaps that exist at present in the flow of ideas across the different continents, and to also encourage research in emerging markets into the mainstream of financial intermediation and corporate finance research.
